

opencl overview the khronos group inc - *opencl open computing language is the open royalty free standard for cross platform parallel programming of diverse processors found in personal computers servers mobile devices and embedded platforms*, **fpga programming with opencl codeproject** - *fpga optimizations for any new device and programming method there are tips and tricks to achieve top performance these optimizations may range from familiar approaches such as data structure organization and clean thinking on algorithms to the most effective ways to express pipelining with opencl*, **opencl optimization guide amd** - *organization see opencl performance and optimization is a discussion of general performance and optimization considerations when programming for amd accelerated parallel processing devices and the usage of the amd codexl gpu profiler and app kernelanalyzer2 tools*, **cuda toolkit documentation nvidia** - *programming guide this guide provides a detailed discussion of the cuda programming model and programming interface it then describes the hardware implementation and provides guidance on how to achieve maximum performance*, **intel fpga sdk for opencl best practices guide altera** - *this document assumes that you are familiar with opencl concepts and application programming interfaces apis as described in the opencl specification version 1 0 by the khronos group*, **opencl the gpu open compute language processors** - *opencl is the first truly open and royalty free programming standard for general purpose computations on heterogeneous systems opencl allows programmers to preserve source code investment and easily target multi core cpus gpus and apus*, **free programming languages freebyte s guide to** - *free programming languages abc abc is an interactive programming language and environment for personal computing originally intended as a good replacement for basic*, **guides and sample code apple developer** - *guides and sample code search guides and sample code documents copyright 2016 apple inc all rights reserved*, **pocl portable computing language** - *pocl is a portable open source mit licensed implementation of the opencl standard 1 2 with some 2 0 features supported in addition to producing an easily portable open source opencl implementation another major goal of this project is improving performance portability of opencl programs with the kernel compiler and the task runtime*, **cuda toolkit 3 1 downloads nvidia developer** - *cuda toolkit 3 1 download quick links windows linux macos for the latest releases see the cuda toolkit and gpu computing sdk home page*, **sdaccel development environment all programmable** - *sdaccel is a development environment for opencl applications targeting xilinx fpga based accelerator cards this environment enables concurrent programming of the in system processor and the fpga fabric without the need for rtl design experience*, **the 100 most popular programming languages** - *introduction to computer programming including a brief history timeline plus a growing collection of guides for specific programming markup languages such as java python perl html5 and much more*, **gpu caps viewer graphics card and gpu information utility** - *gpu caps viewer is a graphics video card utility that quickly provides the essential information regarding the gpu*, **c c pdf ebooks all it ebooks** - *learn the main features of azure cosmos db and how to use microsoft s multi modal database service as a data store for mission critical applications*, **amd support and radeon software driver download** - *amd support and radeon software drivers for radeon firepro apu cpu desktops laptops*, **getting started with sse programming the supercomputing blog** - *this tutorial will introduce you to sse and how to use it in your programs using sse instructions can greatly increase the performance of your programs*, **processor sdk rtos software developer guide texas** - *for technical support please post your questions at http e2e ti com please post only comments about the article processor sdk rtos software developer guide here*, **github quozd awesome dotnet a collection of awesome** - *github is where people build software more than 27 million people use github to discover fork and contribute to over 80 million projects*, **cheat sheet all cheat sheets in one page** - *all cheat sheets round ups quick reference cards quick reference guides and quick reference sheets in one page*
